

## UPDATE

To encourage additional opportunities for the development of physician competence in the quality performance and interpretation of cardiovascular computed tomography, the date to qualify for Level 2 or Level 3 training on the basis of prior experience as outlined in the ACCF/AHA Clinical Competence Statement on Cardiac Imaging With Computed Tomography and Magnetic Resonance (J Am Coll Cardiol 2005;46:383–402) has been extended until July 1, 2010.

Therefore, in the article by Budoff MJ, Cohen MC, Garcia MJ, et al., “ACCF/AHA clinical competence statement on cardiac imaging with computed tomography and magnetic resonance: a report of the American College of Cardiology Foundation/American Heart Association/American College of Physicians Task Force on Clinical Competence (ACCF/AHA Committee on CV Tomography),” which appeared in the July 19, 2005, issue of the journal (J Am Coll Cardiol 2005;46:383–402), the date “July 1, 2008” should be updated to “July 1, 2010” in the following places:

1. On page 392, Table 5: “Training completed after July 1, 2008” and “Training completed before July 1, 2008.”
2. On page 393: “Thus, these practitioners can qualify for completion of Level 2 or Level 3 training by having achieved the minimum criteria set forth below by July 1, 2008, as well as board certification and completion of an ACGME-approved radiology or nuclear medicine residency or cardiology fellowship, or at least two months of formal training in CCT.”
3. On page 400: “These practitioners can qualify for completion of Level 2 or Level 3 training by having achieved the minimum criteria set forth below by July 1, 2008, as well as board certification and completion of an ACGME-approved radiology residency or cardiology fellowship, or at least six months’ formal training in CMR.”
4. On page 400, Table 8: “Training completed after July 1, 2008” and “Training completed before July 1, 2008.”
